

Spectra 9 Plus Portable Double Electric Breast Pump

RRP \$249.00

The Spectra 9 Plus Portable Double Electric Breast Pump – for mums wanting complete portability and flexibility so they can pump how they like, when they like and where they like!

All components in contact with your milk are BPA free.

Description

Finally, the Spectra 9 has been re-released as the upgraded Spectra 9 Plus, which has all the features you loved about the Spectra 9 but with some very important extras to make your life easier.

Features

- The Spectra 9 Plus comes with a complete double kit
- It has a nozzle for each milk collection kit, making it easy to swap from single to double pumping.
- Letdown mode – switch with a touch to the letdown mode, which is a light, quick mode designed to speed the start of milkflow, just the way a baby does.
- Easy adjustment of suction strength and cycle speed together – touch button controls allow you to adjust suction strength and cycle speed with one touch.
- Inbuilt rechargeable battery
- LCD display so you can easily see where you're at with vacuum and cycle settings, Battery indicator, and a timer.
- The Spectra 9 Plus is our most portable pump – lightweight and slimline, it will slip easily into your handbag.
- Closed system – like all Spectra breast pumps, the Spectra 9 Plus has a closed system, which means that there is no way for milk to get into the pump motor.
